

Mission

To broadcast live orthodox services and teachings to the world.

Vision

To help local parishes and monasteries minister to their local communities.

We hope to help Orthodox Churches in America (and the rest of the world) use unlicensed AM transmitters, internet broadcasting tools, and digital recordings to reach out to shut ins, seekers, and parishioners alike.

Low Power AM Transmitter

Fully Certified
This complete broadcasting system is FCC 15.219 and Industry Canada RSS-210 certified with the included antenna for use anywhere in North America. Certification with the authorities assures you that your radio station is

fully legal in the eyes of the law which provides you peace of mind and credibility in business.

Great Performance

Using the most efficient MOSFET output circuitry and a custom-wound air coil for antenna matching results in the maximum range achievable within the limited scope of the Part 15 rules. Low distortion, hi-fi audio frequency response and transformerless architecture guarantee a sweet, uncolored sound with no strange artifacts. A pleasure to listen to - sounding just like big commercial stations.

Board of Directors

Tim Gates

Priest - Father Daniel Mathewson

Treasurer - Vera Meeks

General Manager - Steven Mathewson

Annual Report - Update

Dear Holy Assumption Members, and other supporters,

Each week we broadcast live audio from Holy Assumption Divine Liturgy. We are able to record, and then post a link to the homily given by our priest. (available from the Sermon link on holyassumption.net)

This year we had a booth at the All American Council in Pittsburgh, PA. We managed to broadcast many of the recordings from the council on our internet stream. If you haven't heard any audio from the council I would encourage you to download it and listen to it. In particular the remarks of then Bishop Jonah (now Metropolitan of the OCA). These audio links can be found here :

<http://ancientfaith.com/specials/oca15aac>

We will continue our mission and hope to incorporate our vision into a grassroots network of other churches and monasteries., broadcasting through the internet ,and using the LP AM transmitters. These tools, God willing, will further the gospel of Christ and reach out to many people.

Please pray for our efforts. If you can donate towards funding some of these projects see Steven OR Vera, or mark your donation to INBN.

In Christ,

Steven Mathewson
GM
